#### **DETAILED ACTION**

### Specification

1. The disclosure is objected to because of the following informalities: The applicant only submits 24 figures in the application. In the DESCRIPTION OF THE DRAWING, applicant reference to Figure 25 in page 6.

Appropriate correction is required.

## Drawings

2. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: Fig. 25. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The applicant only submits 24 figures in the application. In the DESCRIPTION OF THE DRAWING, applicant reference to Figure 25 in page 6.

# Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Application/Control Number: 09/489,605

Art Unit: 2171

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

- 2. Claims 1-15 are rejected under 35 U.S.C. 102(e) as being anticipated by Ferrel et al (U.S. 6,199,082).
  - ♦ As per claim 1, 6, 11, Ferrel provides a method and system, a program storage device readable machine for delivering separate design and content in a multimedia publishing system (See column 1 line 5-10).
  - "A function layer" is the Viewer in Fig. 2 element 202.
  - "A data repository" is the Publisher Workstation in Fig. 2 element 102.
  - Ferrel provides a screen display as displayed by the Viewer 202 of figure 2, that has the same functions as "functional layer" for interfacing with a user interface (See Figure 6 and 7, column 19 line 53- column 20 line 1-35), and a host data center that works same as "data repository". The host data center comprises a plurality of application servers that stored entities (See Figure 3, column 14 line 35-67 column 15 line 1- 40).
  - ◆ As per claim 2, 7, 12, the Viewer in figure 2 can be described as providing the run-time view of a title. The viewer component synthesizes the set of objects.

    Several subsystems are used to perform this process of synthesizing a run-time view of a title. Ferrel referred the subsystems same as "module" in the invention.

Page 4

Application/Control Number: 09/489,605

Art Unit: 2171

The acquisition subsystem can be prompted to acquire content for the entire title or an individual section. The IResolve Magnet interface is used to retrieve "a list of content" IDs for each search object (See column 52 line 30-67, column 53 line 1-35). An example of a content layout is described in Figure 7 (See column 20 line 17-67, column 18 line 1-20).

- ♦ As per claim 3, 8, 13, Ferrel uses a tree structure to represents the entire structure of the title. User can manipulates the list of content by dragging and dropping each object's icon to redefine the content or order of the compilation (See column 20 line 50-65).
- ♦ As per claim 4-5, 9-10, 14-15, figure 7 is a hierarchically structure; it can be thought of as a folder which can contain other sections (sub-sections), search objects, style sheets, pages, and content (see column 20 line 18-65). The left pane 404 uses standard Explorer views, as well as a special view built for the window 400, which sorts according to a user-defined order and allows the user to change the order by dragging and dropping each objects' icon. The objects are preferably grouped by type of object, such as, for example, subsection objects 412, page layouts 420 and content objects 422. The order of the pages and content objects is significant. Figure 4 and 5 are example of container hierarchy (see column 15 line 45-67, column 16 line 1-30).

#### Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 09/489,605 Page 5

Art Unit: 2171

◆Van Huben et al (U.S. 5,966,707) teaches a method for managing a plurality of

data processes residing in heterogeneous data repositories.

◆ Antony Azio Faustini (U.S. 5,913, 065) teaches a system, method and article of

manufacture for creating hierarchical folder components for use in a Java

application or applet.

4. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Cam-Linh T. Nguyen whose telephone number is 703-

305- 1951. The examiner can normally be reached on Monday - Friday from 8:00 am to

4:30 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor. Safet Metjahic, can be reached on (703) 308- 1436. The fax phone number

for the organization where this application or proceeding is assigned is 703-746-7239.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is 703-305-
